

Electric Vehicle Roadmap

Fleet organisation survey – current status

This document captures your current fleet position to determine your preparation to in transitioning to Electric Vehicles (EVs), in line with the government's proposed commitment to ban the sale of new petrol and diesel vehicles by 2030.

The questions can be used to benchmark your fleet EV readiness score with the industry and enable you to consider, plan and prepare for electric vehicles during the next two vehicle replacement cycles.

1. Do you have any EVs in your fleet now?

- Yes
- No
- Just Plug-in Hybrids

2. Do you drive an EV yourself?

- Yes
- I drive a Plug-in Hybrid
- No – but I plan to at the next change
- No – please state why below

3. If you don't already drive an EV do you look forward to driving one?

- Yes
- No
- I don't know
- No opinion – it's just a car

4. When do you think EVs will make up 100% of your fleet?

- Less than 5 years
- 5 - 10 years
- 10 - 15 years
- Over 15 years
- Never

5. Does your company have targets/aspirations around reducing its carbon footprint?

- Yes – this is a key element of our business plan
- Yes – but we need to do more
- We already have a very low carbon footprint
- No – but we plan to
- No – it doesn't matter to us

6. Are you required to demonstrate your attitude and approach to sustainability/corporate social responsibility (CSR) to your clients and prospects?

- Yes
- No
- No – but this will become more important

7. What factors do you feel could inhibit EV adoption in your company?
(Choose all that apply)

- Price /Cost
- Limited driving time / range
- Lack of public chargepoints
- Lack of vehicle choice
- Cost of installing workplace charging points
- Any other (Please specify)

8. Why are you considering adoption of EVs into your fleet?
(Choose all that apply)

- Cost savings
- Reduce Carbon Footprint
- Because we will have to by 2030
- Help us win new clients by showing commitment to CSR
- Other – please specify

9. Will you consider use of Plug-in Hybrid Vehicles (PHEVs) alongside EVs in your fleet?

- Yes – only if EVs aren't appropriate for certain drivers
- Yes – all drivers will be able to choose a PHEV
- No – we plan to move to full EV
- No – we don't plan to migrate to PHEV or EV
- Maybe in the short term
- Don't know

10. How do you determine vehicle choice for your drivers / grades?

- Monthly lease rental
- Purchase price
- List price
- Whole Life Cost
- Manufacturer specific choice (e.g. VAG /BMW only)
- Other

11. Do you have any vans in your fleet?

- Yes
- No
- Sometimes on daily rental

12. If yes, are these vans taken home by drivers overnight?

- Yes
- No
- Sometimes

13. If you install EV chargepoints at your office, will you charge your drivers to use them?

- Yes
- No
- Depends on whether they are job need or perk drivers

14. Does your office / offices have a car park with space to install EV chargepoints?

- Yes
- No
- Some sites do, some don't

15. Do your vehicles regularly operate within London's Ultra Low Emission Zone or Congestion Charge Zone, or another town or city's Clean Air Zone?

- Yes
- No

16. Does your Driving for Work policy reflect the potential introduction of EVs into your fleet?

- Yes
- No
- We don't have a Driving for Work policy
